Skin Treatment & Peels

A chemical or all natural solution is used, depending on the treatment chosen, as a method to improve facial skin by removing and repairing its damaged outer layer of skin cells. Alpha Hydroxy (AHA/BHA) acids are the gentlest of these and are used for milder peels. Medium to slightly deeper peels sometimes involve the application of trichloroacetic (TCA) acid and phenol acids. The precise formula used is adjusted to meet each patient's needs. Peels improve skin tone and texture, reduce signs of aging such as fine lines and wrinkles, unclog pores and aid in the treatment of acne, firm and tighten skin, reduce hyperpigmentation, pore size and noticeable scars, can remove precancerous tissue without ablation and stimulate the production of collagen and elastin. The skin is left softer, brighter, and healthier looking.

*Most of the following can also be performed on other areas such as the chest, back, arms, hands, etc.

*Price to be determined upon consultation for other bodily areas and PCA Treatments to be determined upon consultation.

Dermaplaning is a gentle form of manual exfoliation of the skin that resurfaces sun-damaged, dull, dehydrated skin performed by using a surgical blade gently scraping the outermost layers of the epidermis ridding it of dead skin cells, and vellus hair. Dermaplaning exfoliates the skin, regenerates new skin cells thus leaving the complexion smooth, soft and vibrant.

Injectables

Botox® is used to relax the muscles creating a youthful, healthy, rested appearance and reducing fine lines and wrinkles.

Dermal Fillers with minimal discomfort and down time, fillers can be used to eliminate creases and lines, acne scars and under-eye circles. Lip plumping is a favorite treatment which can dramatically add beauty and remove years.

Juvéderm® the latest technology of dermal fillers is used to replenish areas of the face where youthful fullness may have faded. 15 minutes yields results with minimal recovery or downtime.

Restylane® is used extensively for tissue augmentation, reducing facial lines and wrinkles immediately upon injection. Restylane lasts for 4 to 6 months.

Radiesse™ is used to fill lines and deep wrinkles. A single treatment can last a year or longer.

Sculptra® Aesthetic is a new type of facial injectable that is not an overnight miracle. It is long lasting and not a quick-fix. It is the first facial injectable that gives you subtle results over time replacing lost collagen, giving you a more natural looking appearance. A full treatment of Sculptra Aesthetic is an average of three injection sessions over a few months and can last more than two years.

Natural solution used to improve facial skin by removing and repairing its damaged outer layer of skin cells with no down time

SIGNATURE TREATMENT

The Ultimate Experience! \$199

This treatment begins with a deep, yet gentle ultimate cleanse, scrub and peel, specifically selected for your skin type. To further brighten and rejuvenate your skin, Microdermabrasion is utilized and followed by gommage. Next, rest under hydrating steam with an enzyme treatment, after which extractions are performed as needed.

Now your face, neck, shoulders, and décolleté will be treated to a relaxing, stimulating and firming anti-stress massage. With your particular skin in mind, the complementary mask is applied and accompanied by a soothing hand and arm massage. This treatment would not be complete without a Petite Oxygen Treatment for the utmost nourishment and revitalization.

OXYGEN

Oxygen treatments are beneficial to many skin types and are especially ideal for mature, dry, sun-damaged or skin in need of detoxification. Oxygen, used along with vitamins, minerals, enzymes and amino acids, nourish, revitalize and refresh skin cells. Working at a cellular level, oxygen attaches to collagen and elastin molecules making skin firmer and suppler. Introducing oxygen to the skin helps reduce acne-causing bacteria and aids in post-operative healing.

MICRODERMABRASION

Microdermabrasion is a fast, non-invasive and painless method of skin resurfacing that produces softer, smoother glowing skin.

The removal of damaged skin cells stimulates collagen production and promotes the formation of new skin cells, which results in clearer skin tone and texture, softening of fine to moderate lines and wrinkles, improvement of acne conditions, reduction of uneven skin tone and noticeable and prominent pores and scars.
